THE GREATEST ADVANCE STEP EVER

MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting under the plate while cating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hitherto used.

Thave secured Letters Patent for the United States, England and France.

The improvement is not in material, but in

The improvement is not in material, but in the construction, which secures the atmospheric pressure on the entire plate.

HISTORY OF THE WAR.

HUNGARIAN OATS!! By Hon. Alexander H. Stephens.

This great work presents the only complete and impartial analysis of the causes of the Wap yet published, and gives these interior lights and shadows of the great conflict only known to those high officers who watched the flood-tide of revolution from its fountain springs, and which were so accessible to Mr. Stephens from his position as second officer of the Confederacy.

The public that has been surfeited with apparently similar productions, we promise a change of fare, both agreeable and salutary, and an intellectual treat of the highest order. The Great American War has at last found a historian worthy of its importance, and at whose hands it will receive that moderate, candid and impartial treatment which truthland justice so urgently demand.
